## Profile

Backend - Python  
Frontend - JS, Typescript, ReactJS, BootstrapCSS  
Tools - Django, Flask, Postgres, NoSQL, Microsoft  
Azure, AWS,  
Git, Jira

## Experience

**Software Engineer, GoBOLT** - July 2021- Jan 2023

A 3LP logistics provider with transport management, warehouse management, shipment tracking, partner management and trip management.

- Successfully enabled order pickup and delivery services to multiple locations, enhancing the company's operational efficiency.
- Implemented live tracking of orders, providing real-time visibility to customers and stakeholders. Utilised SMS and email notifications to keep customers informed about order status.
- Optimised the billing system by automating the bill generation process based on the total traveled distance, reducing manual effort and potential errors.

**Software Engineer, Knowlarity Communication** – 2018-2020

- Developed and maintained live calls monitoring system
- Improved performance of core components
- Developed APIs to automate manual tasks for internal sales team

**Full-stack Engineer, Shoptimize** - 2017-2018

Full-stack development for e-commerce websites using Php and Magento

**Software Developer Intern, Helpshift Technologies** - 2016

**Software Developer Intern, Globant** - 2015
